

A highly effective & broadspectrum water based odourless liquid concentrate formulation of very low irritancy, particularly suitable for sensitive applications such as use in hospitals and restaurants. For the effective, fast and long residual control of Public Health pests such as mosquitoes, flies, sand & stable flies, houseflies, moths, but also crawling insects such as cockroaches, bedbugs, fleas and silverfish.

Cyflulod 5EW

INSECTICIDE FOR SENSITIVE AREAS

Cyfluthrin formulated as an oil-in water emulsion formulation offers an odourless product of very low irritancy and therefore particularly adapted to sensitive applications such as hotels, restaurants and hospitals.

The presence of water also induce that the Cyflulod 5EW is not flammable facilitating its storage and transportation.

Cyflulod 5EW can be used safely, reliably and effectively preventing any danger to PublicHealth. Cyflulod 5 EW, usually used in spray application, can also be used by fog or net impregnation.

COMPOSITION:

50 g/L of the Synthetic Pyrethroid Cyfluthrin
Inert ingredients Up to 100%

GENERAL I NSTRUCTIONS

Mixing: Add the contents of Cyflulod 5EW directly to the required quantity of water while stirring.

Before use, remove or cover all exposed foodstuffs; cover all dishes, ustensils and places where food is prepared or stored. **After use,** ventilate treated area and clean-up thoroughly.

Cyflulod 5EW is primarily used for residual spray applications, to walls, cracks and crevices, and other surfaces where pests may occur. In addition, the product can be diluted in water and applied as a fog using thermal and mechanical fogging equipment. The use of water carrier means that the fog is very transparent, but the efficacy is the same as for thick fogs.

SITUATIONS	PESTS	DILUTION RATE	DIRECTIONS FOR USE
Indoor & outdoor areas: - Commercial & industrial premises - Food, handling and processing establishments - Offices - Hospitals - Hotels & restaurants - Schools - Homes - Ships - Market places - Warehouses & empty silos - Stables	Cockroaches, silverfish, ants, stored product pests, earwigs, millipedes, crickets, termite nests, bedbugs, fleas, spiders, ticks, flies and mosquitoes	80 ml/ 10 Ltr	Thoroughly spray possible hiding places (cracks & crevices, gaps...) and other places where pests can occur with 50 ml of spray mixture/m ² . If hiding places are not accessible, spray a barrier around them. For ants and termite nests, drench the nest with the mixture and spray the nest surface and its surrounding area.
	Flies and mosquitoes.	Residual spray 60-120 ml/ 10 ltr	Spray 50 ml/ m ² in areas where flying pests rest, such as ceilings, girders, the sides of animal pens, around doors and windows, the surrounding vegetation. For flies control, spray on rubbish tips.
		Thermal fogging 20 ml/ ltr	Dilute in water and apply 100-200 ml mixture/ 100 cubic metres.
- Impregnated bed nets		1 ml/ m ²	Measure the size of the net and determine how many litres of water are absorbed when the net is immersed in water. Dilute in water and put the dry net in. Ensure that the net is evenly treated and lay it out horizontally to dry.
- refuse dumps	Flies and cockroaches	40 ml/ 10 ltr	Spray at least 100 ml of the spray mixture over each square metre of the refuse.
